SQL Server, MongoDB, Entity Framework

CRM & BI Tools

Microsoft Dynamics 365 CRM, Power BI, Power Platform

Version Control

Git, GitHub, Bitbucket

Frameworks

ASP.NET Core, Blazor, Angular, Node.js, Express.js

Cloud & DevOps

Microsoft Azure, Azure DevOps, CI/CD Pipelines

Development Methodologies

Agile (Scrum), SOLID Principles

EDUCATION

Professional Development and BI-infused CRM Program(9-months)

October 2024 – July 2025

Information Technology Institute (ITI), Aswan, Egypt

- Completed an intensive, project-based 1070+ hour training focused on Full-Stack .NET Development, Microsoft Dynamics 365 CRM, Power Platform, Business Intelligence, and Cloud Solutions (Azure).
- Developed enterprise-level applications with ASP.NET Core, Blazor, Angular, and Azure.
- Gained certifications and hands-on experience aligned with top industry standards.

Bachelor of Computer Science

September 2020 – June 2024

Computer Science Department, Faculty of Computers And Information, Luxor University
GPA 3.52/4.0 (with honors, ranked 3rd)

- Completed a four-year degree in software development, data structures, algorithms, and computer systems.
- Gained strong technical foundations in object-oriented programming, databases, and web development.
- Completed academic projects utilizing C#, SQL Server, and web technologies.

PROJECTS

PointPay Rewards & Loyalty SaaS Platform

January 2025 – June 2025

ASP.NET Core, Blazor, C#, Entity Framework, SQL Server, Microsoft Azure, Power BI

- Designed and developed a cloud-based customer loyalty platform for retail businesses.
- Built user-friendly dashboards and real-time reward tracking systems using .NET technologies.
- Implemented secure wallet systems, gamified reward redemption, and dynamic store management features.

Online Bookstore Platform (Admin + Client Panels)

April 2025 – June 2025

Angular, Node.js, Express.js, MongoDB

- Developed a web-based bookstore with separate user and admin modules.
- Implemented secure authentication, advanced routing, and responsive design for mobile/desktop devices.
- Enabled users to browse and search books; Admins can manage inventory with CRUD operations.
